Network Licenses

Bruker software licenses are issued as *network (= floating)* licenses

Such licenses can be utilized by *more than one* PC in the network (= *clients*)

Software prices depend on the *number of clients* supported by the license, e.g. 1, 5, 10.

Licenses are generated from the *Media Access Control address (MAC address)* of a PC's network adapter

When choosing the MAC address of an USB Ethernet adapter, you will have a *transportable license* !

Full License

Provides access to all TopSpin features.

Supports displaying, processing, analyzing and plotting

No support for data acquisition, NmrSim, NmrGuide

Supports displaying and plotting. Also supports manual phase correction

No support for data acquisition, processing, analysis, NmrSim, NmrGuide

Supports displaying, processing, analyzing and plotting

BUT: Datasets must be older than 4 weeks. This limitation is due to the low price of this license

Also supports NmrSim. Simulated data do not have the 4-weeks restriction

License is free of charge! (Not the media)

Supports data viewing

No support for data acquisition, processing, analysis, plotting, NmrSim, NmrGuide

This license can be used to develop own applications for TopSpin, e.g. AU programs, Python or Java programs

Like a full license, but time-limited to 3 months.

License free of charge (not the media)
